

## Paper Cup Weaving

Goal: Teaches patience and observational skills as students see how the woven project comes together

### Materials -

- Paper Cups
- Yarn
- Tape
- Scissors

### Procedure -

1. Cut the paper cup into 5 strips, from the top of the cup to about a quarter inch from the bottom
2. Tape one end of the yarn to the bottom of the cup
3. Weave the yarn around the strips in an "over, under, over..." fashion
4. Upon reaching the top, tie off the yarn and cut off any excess

☆ Explanation: When first weaving, the results aren't very apparent. Students have to be patient before seeing the weaving start to show
