

Shaving Cream and Food Dye

Goal: Students will spread a thin layer of shaving cream on a tray and draw their design using food coloring and a coffee stick. The more creative, the better!

Materials -

- Shaving cream
- Food coloring
- Coffee sticks (to draw/move the food coloring around to create a design)
- Tray (large enough to hold the paper)
- Disposable trays should also work.
- Baking trays
- Cardstock or some other thick/heavy paper
- Squeegee, can use an old gift card (that should work too :))

Procedure -

1. Place a thin layer of cream to the bottom of the tray, no need to worry about whether the cream is smooth or not.
2. Students will place drops of food coloring into the shaving cream and create a "water marble" design
3. Once complete, place the sheet of paper face down onto the shaving cream
4. Apply some light pressure onto the back of the paper to ensure that the design, coloring, and shaving cream are able to stick to the paper
5. Carefully lift the paper out of the tray
6. Lay the sheet on a flat surface and take a squeegee or an old gift card and begin to push the excess cream off
7. The end product should show that the marbling design is transferred onto the paper.
